GCE MARK SCHEME (New Specification - Wales only)

SUMMER 2018

HISTORY - UNIT 3
BREADTH STUDY 8

THE AMERICAN CENTURY, c. 1890-1900

1100UH0-1
INTRODUCTION

This marking scheme was used by WJEC for the 2018 examination. It was finalised after detailed discussion at examiners’ conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates’ responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners’ conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.
UNIT 3
BREADTH STUDY 8
THE AMERICAN CENTURY 1890-1990

MARK SCHEME

Marking guidance for examiners

Summary of assessment objectives for Unit 3

The questions each assess assessment objective 1. This assessment objective is a single element focussed on the ability to analyse and evaluate and reach substantiated judgements. The mark awarded to each question chosen in this assessment is 30.

The structure of the mark scheme

The mark scheme for Unit 3 has two parts:

- advice on each specific question outlining indicative content which can be used to assess the quality of the specific response. This content is not prescriptive and candidates are not expected to mention all the material referred to. Assessors should seek to credit any further admissible evidence offered by candidates.

- an assessment grid advising which bands and marks should be given to responses which demonstrate the qualities needed in assessment objective 1.

- the assessment grid for questions 1 and 2 and that for question 3 differ in that the assessment for question 3 expects candidates to demonstrate understanding of change and/or development over the long term (at least 100 years).

Deciding on the mark awarded within a band

The first stage for an examiner is to decide the overall band. The second stage is to decide how firmly the qualities expected for that band are displayed. Thirdly a final mark for the question can then be awarded.

Organisation and communication

This issue should have a bearing if the standard of organisation and communication is inconsistent with the descriptor for the band in which the answer falls. In this situation, examiners may decide not to award the highest mark within the band.
'Migration from south to north was the most important development affecting the lives of African Americans in the period 1890-1929.' Discuss.

Candidates are expected to consider and debate the full range of issues that affected the key concept in the question – in this case whether migration from south to north was the most important development affecting the lives of African Americans in the period 1890-1929. They will consider a range of key concepts such as causation, consequence, continuity, change and significance where appropriate and also the relationship between the key characteristics and features associated with the issue in the question.

Candidates will offer an analysis and evaluation of the extent to which migration from south to north was the most important development affecting the lives of African Americans in the period 1890-1929. In order to reach a substantiated judgement about this issue, candidates may argue that migration was the most important development in this period. The response might support this proposition by considering issues such as:

- It was the largest internal population movement in US history - 1.25 million African Americans moved to the North and West.
- War production and hatred of segregation were significant causes of migration.
- Cities such as Chicago, Detroit and Cleveland saw significant growth through migration.
- New racial and social problems spread into the North, including discrimination in work and housing.
- Comparison between the experience of Jim Crow/economic conditions in the south and wage economy in north.
- Migration led to rural depopulation in the South with serious economic effects.
- Cultural changes in the northern cities and the actual extent of integration.
- Effects of migration on political attitudes in major northern cities

Candidates might consider challenging the proposition in the question by arguing that there were other more important developments affecting the lives of African Americans in this period. The response might consider issues such as:

- The Jim Crow Laws in 1890s and the experience of segregation in the south.
- Changing economic and social conditions in the south by 1914.
- Supreme Court erosion of civil rights in 1890s.
- Urbanisation in the south and exclusion from industrial employment.
- Activism of the NAACP began to grow.
- Other effects of WWI on attitudes towards greater rights and representation.
- Revival of the KKK in the 1920s.

Overall candidates will offer a debate and come to a substantiated judgement regarding the extent to which migration from south to north was the most important development affecting the lives of African Americans in the period 1890-1929.
How far do you agree that the work of President Johnson had the most significant influence upon the achievement of civil rights for African Americans in the period 1941-1968?

Candidates are expected to consider and debate the full range of issues that affected the key concept in the question – in this case the extent of the influence of the work of President Johnson on the achievement of civil rights in the period 1941-1968. They will consider a range of key concepts such as causation, consequence, continuity, change and significance where appropriate and also the relationship between the key characteristics and features associated with the issue in the question.

Candidates will offer an analysis and evaluation of the influence of the work of President Johnson on the achievement of civil rights in the period 1941-1968. In order to reach a substantiated judgement about this issue, candidates may argue that Johnson did have a huge influence upon the achievement of civil rights. The response might support this proposition by considering issues such as:

- Johnson’s early career and his success in the Senate with the 1957 Civil Rights Act
- His genuine concern for minority groups throughout his career
- Johnson's skill in managing the Kennedy legacy after 1963
- His political skill in passing the Civil Rights Act 1964 and Voter Registration Act 1965
- The impact of the above legislation in theory and practice
- The impact of the Great Society programme
- There may be qualification of his significance with reference to racial violence after 1965 and the Watts riots in LA
- Also his failure to engage with civil rights leaders post 1966 and the impact of Vietnam.

Candidates might consider challenging the proposition in the question by arguing that there were other equally or more significant influences which helped achieve civil rights in this period. The response might consider issues such as:

- The impact of the Second World War on black Americans and their attitudes
- Truman and the executive order 1948
- Supreme Court activism in the 1950s
- Incidents such as those at Little Rock / Montgomery bus boycott
- The role of Martin Luther King and the civil rights movement
- Kennedy’s slow but significant conversion to legislation and executive action on the issue
- Growth of radical activism in the 1960s

Overall candidates will offer a debate and come to a substantiated judgement regarding the extent of the influence of the work of President Johnson on the achievement of civil rights in the period 1941-1968.
INDICATIVE CONTENT FOR QUESTION 3

NOTE: This content is not prescriptive and candidates are not expected to mention all the material referred to below. Assessors should seek to credit any further evidence offered by candidates. Each answer will be assessed on its merits according to the assessment grid as well as the indicative content.

- Links with the continued development of the Cold War and US foreign policy until the 1970s.

Candidates might consider challenging the proposition in the question by arguing that there were other turning points in US foreign policy which can be evaluated and compared with the Truman Doctrine for their significance. The response might consider issues such as:

- The growth of American imperialism in the late nineteenth century.
- America’s entry into WW1 and the impact upon peace treaties.
- Isolationism in the 1920s and 1930s and its effects on Europe.
